

Social Enterprise Build It Up Investment— Between £1,000 and £5,000

The Social Enterprise Build It Up Investment is available to existing social enterprises targeted at social entrepreneurs who demonstrate a strategic ambition to grow their social enterprise venture. This growth can be through demonstrating scaled social impact, job creation, or developing a sustainable business model. It also includes growth through the introduction of a new product or service, or the scaling of existing products and services.

Social enterprise applicants for this investment need to have been trading for a minimum of 2 years and demonstrate the business has been generating at least 51% of their income through trading and delivered measurable social impact over that time rather than being reliant on funding sources to deliver its value.

Applicants should be able to demonstrate the value the investment will add to the social enterprise's sustainability and additional social impact, be that community or environmental. Successful applicants will be required to demonstrate the impact of the investment as part of the ongoing monitoring and evaluation process.

The Investment can be used for eligible spend like the Start Up investment and includes the cost and salary costs of recruiting additional staff. However, the investment may not be used to pay costs or salary of the business owner, existing staff, or any Directors of the business.

The full criterion for the fund is outlined below in section 4.2.1.
